What is intuitive painting?

Intuitive painting is the practice of pulling out YOUR creativity.

Intuitive painting is sort of meditating with a brush and other artistic tools.

Intuitive painting brings you inside colors, paint, textures, lines, and process while locating the inner core of your creative self.

Intuitive painting is a self exploration practice and it's also sometimes called art therapy with no analysis.

Our practices for this short level 1 course include monotyping, composition with bold colours and shapes, from scribbles to professional abstract arts, collage, mixed media.
